I am dealing with the Fed on an idea to solve things. I need a smart friend to help me think through this stuff.
Can I get you out for a weekend to help me (are they listening?).

Jes

The financial markets, are now a complex dynamical system the old methods of relief and analysis, were based on statistics that were founded in mathematics and physics they no longer apply, as the system are now closer to a biological system. Increasing blood or money flow will not fix it. First the patient needs to be stabilized, then rethought with the global internet, as the distribution system. Like the music business used to be going to the store to buy a cd, and then file sharing and downloads changed it forever, the global system has to be rethought. (the only analogy to date would be the internet regulation attempts.) any way happy holiday, give [REDACTED] some times over the weekend and I will try to call
