GEM TRADE LABORATORY

DIAMOND GRADING REPORT

June 23, 2000

Shape and Cutting Style **ROUND BRILLIANT**
 Measurements **6.36 - 6.42 x 3.86 mm**
 Weight **1.00 carat**

Proportions
 Depth **60.4 %**
 Table **63 %**
 Girdle **SLIGHTLY THICK TO THICK, FACETED**
 Culet **NONE**

Finish
 Polish **GOOD**
 Symmetry **VERY GOOD**

Clarity Grade **VS2**
 Color Grade **E**
 Fluorescence **FAINT**

Comments:
NONE

This Report is not a guarantee, valuation or appraisal. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under 10X magnification, and/or has been inscribed, using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being inscribed, including fully corrected triplet loupe and binocular microscope, master color comparison diamonds, standardized viewing environment and light source, electronic carat balance, synthetic diamond screening device, high intensity short wave fluorescence imaging system, short wave ultraviolet transmission detection system, optical measuring device, micro laser inscribing device, ProportionScope®, ultraviolet lamps, millimeter gauge, and ancillary instruments as necessary. Red symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown. The recipient of this Report may wish to consult a credentialed Jeweler or Gemologist about the importance and interrelationship of cut, color, clarity and carat weight.

GIA REPORT 11363569

This Report is not a guarantee, valuation or appraisal. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under 10X magnification, and/or has been inscribed, using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being inscribed, including fully corrected triplet loupe and binocular microscope, master color comparison diamonds, standardized viewing environment and light source, electronic carat balance, synthetic diamond screening device, high intensity short wave fluorescence imaging system, short wave ultraviolet transmission detection system, optical measuring device, micro laser inscribing device, ProportionScope®, ultraviolet lamps, millimeter gauge, and ancillary instruments as necessary. Red symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown. The recipient of this Report may wish to consult a credentialed Jeweler or Gemologist about the importance and interrelationship of cut, color, clarity and carat weight.

This Report is not a guarantee, valuation or appraisal. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under 10X magnification, and/or has been inscribed, using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being inscribed, including fully corrected triplet loupe and binocular microscope, master color comparison diamonds, standardized viewing environment and light source, electronic carat balance, synthetic diamond screening device, high intensity short wave fluorescence imaging system, short wave ultraviolet transmission detection system, optical measuring device, micro laser inscribing device, ProportionScope[®], ultraviolet lamp, millimeter gauge, and ancillary instruments as necessary. Red symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown. The recipient of this Report may wish to consult a credentialed Jeweler or Gemologist about the importance and interrelationship of cut, color, clarity and carat weight.

DIAMOND GRADING REPORT

THE FOLLOWING WERE, AT THE TIME OF THE EXAMINATION, THE CHARACTERISTICS OF THE DIAMOND DESCRIBED HEREIN BASED UPON 10X MAGNIFICATION (FULLY CORRECTED TRIPLET LOUPE AND BINOCULAR MICROSCOPE), DIAMONDLITE AND MASTER COLOR COMPARISON DIAMONDS, ULTRAVIOLET LAMPS, MILLIMETER GAUGE, CARAT BALANCE, PROPORTIONSCOPE, AND ANCILLARY INSTRUMENTS AS NECESSARY.

RED SYMBOLS DENOTE INTERNAL CHARACTERISTICS (INCLUSIONS)
GREEN SYMBOLS DENOTE EXTERNAL CHARACTERISTICS (BLEMISHES)
SYMBOLS INDICATE TYPE, POSITION AND APPROXIMATE SIZE (C CHARACTERISTICS. DETAILS OF FINISH ARE NOT SHOWN. DIAGRAM M/ BE APPROXIMATE.

This Report is not a guarantee, valuation or appraisal. This Report contains only the characteristics of the diamond described herein after it has been graded, tested, examined and analyzed by GIA Gem Trade Laboratory under 10X magnification, and/or has been inscribed, using the techniques and equipment available to GIA Gem Trade Laboratory at the time of the examination and/or at the time of being inscribed, including fully corrected triplet loupe and binocular microscope, master color comparison diamonds, standardized viewing environment and light source, electronic carat balance, synthetic diamond screening device, high intensity short wave fluorescence imaging system, short wave ultraviolet transmission detection system, optical measuring device, micro laser inscribing device, ProportionScope®, ultraviolet lamps, millimeter gauge, and ancillary instruments as necessary. Red symbols denote internal characteristics (inclusions). Green or black symbols denote external characteristics (blemishes). Diagram is an approximate representation of the diamond, and symbols shown indicate type, position, and approximate size of clarity characteristics. All clarity characteristics may not be shown. Details of finish are not shown. The recipient of this Report may wish to consult a credentialed Jeweler or Gemologist about the importance and interrelationship of cut, color, clarity and carat weight.
